If the test is done with an In-house kit, select the Manufacturer "In-house" (at the end of the list).

If the kit manufacturer or kit name does not appear on the list, select the "Manufacturer is not listed" or "Catalog is not listed" item to send a request. You will be notified once the kit has been added to the system.

- d. Repeat steps a. to c. to register all assays used in the lab.
  - e. Once the information is complete for all registered assays, the Assay Registration tab turns blue.
  - f. If the test event is Open, click on the Sample Conditions tab to continue the process of submitting results.
  - g. Press Exit if you want to finish the process at another time and go back to the Test Event Dashboard. If the assay registration is not complete or there are missing results, the Registration / Results icon remains red  on the Test Event Dashboard.
- You may add a new Assay at any time by clicking the Select Assay button.
