

Obtain the Participation Statistics

The participation statistics show the statistics and acceptable range for each peer group established during the evaluation for any given program. To obtain this report:

1. Log in to OASYS with your username and password.
2. Click on the menu "Reports" and select the appropriate participation statistics option (either quantitative or qualitative).

3. You can either generate the participation statistics for "All" subscriptions or for a specific subscription, for any test event in the past two years. The reports are generated for a given results deadline and for all or one specific analyte.
